

THE COST OF ENERGY INACTION SEMINAR AGENDA

How much is energy going to cost you in the future?

How to understand 'whole energy risk' and the steps to manage it effectively.
A seminar for all those involved in buying and using energy.

09.30: BREAKFAST AND NETWORKING

Session 1: Introduction and overview

Presenter and Host: Kevin Jackson, Lead Consultant, Inenco

Your bill: What are the components that impact your price and how are they going to increase?

Buying energy: What are you trying to achieve & what is success?

Session 2: The energy markets

Non-commodity charges - Kevin Jackson, Lead Consultant, Inenco

- What are non-commodity charges?
- What are you going to pay going forward?
- What can you do to mitigate some of the increases?

The commodity market - Matthew Osborne, Principal Energy Trader, Inenco

- An update on the market in the last 6 months and where it is going
- What moves the market and how to manage risk?
- How could a commodity strategy mitigate some of the non-commodity increases?

REFRESHMENT BREAK

Session 3: Improve your buying for the future

The Inenco trading game - Put your learnings into action

Looking forward - Robin Preston, Sales Director, Inenco

- Drawing up an integrated strategy for the future
- What should you feed back to your board?
- How to manage the risk and protect your business from the cost of inaction

13.00: QUESTIONS FOLLOWED BY LUNCH AND NETWORKING
