

Turning Inaction into Action

A practical seminar to help mitigate your rising energy costs

This is the second in the series of Inenco seminars following on from the 'Cost of Energy Inaction' seminars.

During this 'hands on' seminar, you will find out:

- What are the increases in energy commodity price since your last renewal?
- What are the non-commodity increases going to be at you next renewal?
- How to review your consumption data to mitigate cost increases?

09.30am: Registration and refreshments

Introduction, overview and recap

Energy costs: What are the components that impact your 'total cost of energy'? – Kevin Jackson, Lead Consultant, Inenco

Session 1: Where are the cost increases coming from?

Commodity charges – Robin Preston, Sales Director, Inenco

- **Update** - Overview of the energy market in the last 24 months and where they are now
- **Practical** - Work out how much commodity prices have increased since your last renewal

Non-commodity charges – Mark Winn, Lead Consultant, Inenco

- **Update** - What are the non-commodity increases going to be at your next renewal?
- **Practical** - Using Inenco's Non-Commodity Cost Dashboard for a personalised projection

Refreshment break

Session 2: How to review your consumption and use it to mitigate cost increases

Reviewing your consumption – Dan Hulme, Consultant, Inenco

- **Update** - What your half hourly data can tell you about your reduction opportunities
- **Practical** - The all new Inenco non-commodity game - Put your learnings into action

Summary & close

Turning inaction into action – Kevin Jackson, Lead Consultant, Inenco

- **What to do next** - Your energy plan
- **The future** - How will AI, IoT, Blockchain and Big Data change the future energy market?

13.00pm: Questions followed by lunch and networking
